

Serial No. 09/863,877

IN THE CLAIMS:

1. (currently amended) An advertisement supplying system for displaying a point which may give viewing persons an incentive to view an advertisement in combination with advertisement information on a terminal apparatus connected thereto via a computer network, comprising:

storage means for storing therein identification information of a customer and a point degree owned by the customer in relation to each other;

means for accepting the identification information of the customer from a terminal apparatus of the customer;

means for acquiring the point degree owned by the customer from said storage means, said owned point degree being related to the accepted identification information of the customer; and

display point degree determining means for determining a display point degree to be displayed in combination with the advertisement information ~~based upon the point degree owned by the customer; wherein~~

~~said display point degree determining means determines the display point degree~~ based upon a relationship between the point degree owned by the customer and the display point degree with reference to a predetermined rule; ~~[[and]] wherein~~

said rule being that ~~while~~ a point degree owned by the customer increases in response to the customer selecting the advertisement~~[[,]]~~ and the display point degree decreases for display in combination with a subsequent display of the advertisement information, and

Serial No. 09/863,877

the display point degree ~~does not decreasing decrease~~ to ~~[[0]]~~ zero for the subsequent display of the advertisement information in response to when the customer first selecting ~~selects~~ the advertisement.

Claims 2-3. (canceled)

4. (original) An advertisement supplying system as claimed in claim 1 wherein:

a minimum value of the point degree to be displayed is equal to 0.

5. (currently amended) An advertisement supplying system for displaying a point which may give viewing persons an incentive to view an advertisement in combination with advertisement information on a terminal apparatus connected thereto via a computer network, comprising:

storage means for storing therein identification information of a customer and personal information related to the customer in relation to each other;

means for accepting the identification information of the customer from a terminal apparatus of the customer;

means for acquiring the personal information related to the customer from said storage means, said personal information being related to the accepted identification information of the customer; and

display point degree determining means for determining a display point degree to be displayed in combination with the advertisement information ~~based upon the point degree owned by the customer; wherein~~

Serial No. 09/863,877

~~said display point degree determining means determines the display point degree~~
based upon a relationship between the point degree owned by the customer and the display
point degree with reference to a predetermined rule; ~~[[and]]~~ wherein

said rule being that ~~while~~ a point degree owned by the customer increases in response
to the customer selecting the advertisement~~[[,]]~~ and the display point degree decreases for
display in combination with a subsequent display of the advertisement information, and

the display point degree does not decreasing decrease to [[0]] zero for the subsequent
display of the advertisement information in response to when the customer first selecting
selects the advertisement.

6. (currently amended) An advertisement supplying system as claimed in claim 5 wherein:

the personal information related to the customer corresponds to information as to at
least any one of a sex of the customer, an age thereof, and a taste thereof.

7. (previously presented) An advertisement supplying system as claimed in claim 1
wherein:

a sort of point degree selected by the display point degree determined means; and
the display point degree determined by said display point degree determining means is
selected from the sort of point degrees selected by the display point degree means.

8. (currently amended) A computer readable medium for causing a computer to function as an
advertisement supplying system for displaying a point which may give viewing persons an
incentive to view an advertisement in combination with advertisement information on a terminal

Serial No. 09/863,877

apparatus connected thereto via a computer network, the computer readable medium having encoded thereon computer codes which when executed on a processor perform the steps of:

storing identification information of a customer and a point degree owned by the customer in relation to each other;

accepting the identification information of the customer from a terminal apparatus of the customer;

acquiring the point degree owned by the customer related to the accepted identification information of the customer; and

determining a display point degree to be displayed in combination with the advertisement information ~~based upon the point degree owned by the customer wherein;~~

~~said determining includes determining the display point degree based upon a relationship between the point degree owned by the customer and the display point degree with reference to a predetermined rule; [[and]] wherein~~

said rule being that ~~while~~ a point degree owned by the customer increases in response to the customer selecting the advertisement[[,]] and the display point degree decreases for display in combination with a subsequent display of the advertisement information, and

the display point degree does not decreasing decrease to [[0]] zero for the subsequent display of the advertisement information in response to when the customer first selecting selects the advertisement.

9. (currently amended) A computer readable medium for causing a computer to function as an advertisement supplying system for displaying a point which may give viewing persons an incentive to view an advertisement in combination with advertisement information on a

Serial No. 09/863,877

terminal apparatus connected thereto via a computer network, the computer readable medium having encoded thereon computer codes which when executed on a processor perform the steps of:

storing identification information of a customer and personal information related to the customer in relation to each other;

accepting the identification information of the customer from a terminal apparatus of the customer

acquiring the personal information related to the customer, said personal information being related to the accepted identification information of the customer; and

determining a display point degree to be displayed in combination with the advertisement information ~~based upon the point degree owned by the customer wherein;~~

~~said determining includes determining the display point degree~~ based upon a relationship between the point degree owned by the customer and the display point degree with reference to a predetermined rule; ~~[[and]]~~ wherein

said rule being that ~~while~~ a point degree owned by the customer increases in response to the customer selecting the advertisement~~[[,]]~~ and the display point degree decreases for display in combination with a subsequent display of the advertisement information, and

the display point degree does not decreasing decrease to [[0]] zero for the subsequent display of the advertisement information in response to when the customer first selecting ~~selects~~ the advertisement.

10. (currently amended) A method of displaying a point in an advertisement supplying system which may give viewing persons an incentive to view an advertisement in

Serial No. 09/863,877

combination with advertisement information on a terminal apparatus connected thereto via a computer network, the method comprising the steps of.

a) storing identification information of a customer and a point degree owned by the customer in relation to each other;

b) accepting the identification information of the customer from a terminal apparatus of the customer;

c) acquiring the point degree owned by the customer from said storage means, said owned point degree being related to the accepted identification information of the customer;

d) determining a display point degree to be displayed in combination with the advertisement information ~~based upon the point degree owned by the customer using;~~
wherein

~~said determining includes determining the display point degree based upon a~~
relationship between the point degree owned by the customer and the display point degree with reference to a predetermined rule; ~~[[and]]~~ wherein

said rule being that ~~while~~ a point degree owned by the customer increases in response to the customer selecting the advertisement~~[[,]]~~ and the display point degree decreases for display in combination with a subsequent display of the advertisement information, and

the display point degree does not decreasing decrease to ~~[[0]]~~ zero for the subsequent display of the advertisement information in response to when the customer first selecting
~~selects~~ the advertisement.
